TECHNICAL DATA SHEET

OLI NATURA® Brush Cleaner

FOR CLEANING BRUSHES AND TOOLS

Water-based brush and tool cleaner with orange oil for removing paint, varnish, oil and wax residues. Suitable for painting, varnish and artists' tools. Clean fresh residues immediately after use. A longer soaking time may be required for dried-on residues.

Range	250 ml	1 litre
Item number	A05011_EK	A05011_DC
Area of application	For cleaning brushes, rollers and other tools after applying water-based or solvent-based paints, varnishes, oils and waxes. Also suitable for removing grease, soot, tar and bitumen residues. Soak to loosen dried-on residues and then scrub them off mechanically.	
Properties	Cleans and degreases tools. Can restore flexibility to hardened brush bristles by soaking. Suitable for brushes with natural hair and Chinese bristles. The cleaning effectiveness depends on the type and degree of hardening of the residues, as well as the contact time. Note: Check material compatibility and cleaning effectiveness on an inconspicuous area before use. Complete removal is not always possible in the case of fully hardened coatings.	
Application	Shake well before use. Pour the required amount into a suitable cleaning container. First, scrape off any coarse paint, varnish, oil and wax residues from the tool and collect them separately. Fresh residues: Immerse soiled bristles or tool parts in the cleaner and work them through thoroughly until the residues come away. Repeat if necessary. Dried-on residues: Soak the affected tool parts overnight. Then work them through thoroughly. If any residues remain, repeat the process. Immerse only the parts to be cleaned; avoid soaking handles and bonded areas where possible.	
Tool cleaning	After cleaning, rinse out any remaining residue with water. Collect the cleaning solution and rinse water and dispose of them according to their level of contamination. Dry the tools, reshape the brush bristles and allow them to dry completely. Discolouration of the cleaner alone does not mean that its cleaning effectiveness has been exhausted. Assess whether further use is appropriate based on the actual cleaning performance. Close the cleaning container after use.	
Technical data	Product type: Water-based brush and tool cleaner with orange oil Form: Liquid and ready for use Pack sizes: 250 ml and 1 litre Storage: Store tightly sealed in a cool, frost-free place. Keep out of reach of children.	
Safety instructions	Keep out of reach of children. Contains Citrus sinensis. May cause allergic reactions. Safety data sheet available on request. Avoid contact with eyes and skin. Use suitable eye and hand protection. For further information on safe handling, personal protective equipment and first aid, refer to the current safety data sheet.	
Disposal	Do not allow product residues, used cleaner, dissolved coating residues or contaminated rinse water to enter the mains drainage system, watercourses or the ground. Dispose of in accordance with local regulatory requirements. Disposal is also dependent on the paint, varnish and other residues present. Send completely empty packaging for recycling in accordance with local regulations.
